

# Become a Kidney Sustainability Champion

## Lead The Change We Need To See

Help drive high-quality, low-carbon, and cost-efficient kidney care.

As a **UK Kidney Sustainability Champion**, you'll lead quality improvement initiatives, develop new skills, collaborate with patients and multidisciplinary teams to create **greener solutions in your centre**.

This scheme is led by the Centre for Sustainable Healthcare in partnership with the UK Kidney Association.

**Join us in making kidney care more sustainable**

## Why become a Kidney Sustainability Champion?

- Address inequalities in healthcare and improve the quality of care delivered to patients
- Connect to a national initiative and network with **like-minded individuals** across the globe
- Lead sustainable quality improvement (**SusQI**) **projects** and develop your QI skills
- Lead and **influence local change** and work with patients to improve care
- Enhance your professional registration and **access CPD** by presenting at events and publishing case studies

## How will you benefit from being involved?

- Complete the Centre for Sustainable Healthcare's **free online self-study course**, giving you skills in sustainable kidney care best practice and how to lead a SusQI project
- Submit data on behalf of your kidney centre (main or satellite) to the **national audit trial**
- Join our **thriving online network**
- Share best practice with your team to **accelerate sustainable change** and improve patient outcomes
- Engage with colleagues and patient representatives on improving sustainability and **quality of care**

## What support will you have?

- Free access to the [CSH online course](#) on Sustainability Kidney Care
- **Global networking** with monthly online events with guest speakers
- Access to [our online network](#) with discussion and resource-sharing
- Access to [valuable case studies](#) and resources
